SUMMARY

Dedicated and detail-oriented Software Engineer with 4 years of experience specializing in Machine Learning and Python backend development. Proven track record of designing and deploying predictive models in production environments and building robust data pipelines.

TECHNICAL SKILLS

Programming: Python, SQL, C++

Data Science: Machine Learning, Scikit-Learn, Pandas, NumPy, TensorFlow

Frameworks: Flask, FastAPI, Django

Tools: Git, Docker, VS Code

WORK EXPERIENCE

Software Engineer (ML focus)

TechCorp Solutions | 2022 - Present

- Led the migration of legacy recommendation models to Python-based TensorFlow systems, improving click-through rate by 15%.
- Built high-performance REST APIs using FastAPI and Flask to serve real-time predictions.
- Maintained complex SQL database queries and ETL data pipelines using Pandas and NumPy.
- Used Git and Docker for version control and containerized deployments in production.

Software Developer

DevBuilders Co. | 2020 - 2022

- Developed Python scripting utilities to automate system diagnostics.
- Wrote web applications using Django and PostgreSQL.
- Collaborated in an agile scrum team to deliver software features on schedule.

EDUCATION

Bachelor of Science in Computer Science

University of Technology | 2016 - 2020

- Graduated with Honors
- Core coursework: Data Structures, Algorithms, Machine Learning, Database Management.

PROJECTS

Smart Forecast System

- Developed a machine learning system in Python using Scikit-Learn to forecast inventory demand.
- Visualized results using Matplotlib and deployed on a local server.
