Email: bob.johnson@email.com

Phone: +1 (555) 043-9876

LinkedIn: linkedin.com/in/bobjohnson-data

## SUMMARY

Senior Data Analyst and Researcher with 3 years of industry experience applying advanced statistical methods and deep learning models to solve complex business problems. Specialized in predictive analytics and neural networks.

## TECHNICAL SKILLS

Languages: Py, R, SQL

Analytics & ML: Deep Learning, Neural Networks, PyTorch, Keras, Data Analytics, Predictive Modeling

Databases: PostgreSQL, MySQL

Platforms: Git, Jupyter Notebook, Linux

## WORK EXPERIENCE

Data Scientist

Insight Analytics Group | 2021 - Present

- Architected and trained deep learning models using PyTorch and Keras to predict customer churn.
- Implemented neural networks for text classification and customer sentiment analysis.
- Conducted complex data analysis and statistical validation on massive database tables.
- Leveraged Jupyter Notebook for rapid prototyping and statistical exploration.

Junior Researcher

Global Science Labs | 2020 - 2021

- Performed statistical modeling and data visualization using R and python.
- Maintained database backups and ran ad-hoc SQL queries on PostgreSQL.

## EDUCATION

Master of Science in Data Analytics

State Research University | 2018 - 2020

- Specialized in Neural Networks and Machine Learning
- Thesis: "Optimizing Recurrent Neural Networks for Time Series Analytics"

## PROJECTS

Deep Sentiment Analyzer

- Created an NLP classifier using PyTorch to analyze social media posts.
- Achieved 91% accuracy using custom transformer models.
