SUMMARY

Principal Systems Architect and DevOps Engineer with over 12 years of experience leading cloud infrastructure transformations, automating software deliveries, and securing high-availability clusters.

TECHNICAL SKILLS

Cloud & Infrastructure: AWS, Azure, Google Cloud

DevOps: Kubernetes, Docker, Terraform, Ansible, Jenkins, CI/CD, Linux

Databases: Cassandra, Redis, DynamoDB, SQL Server

Languages: Bash, Go, Python, PowerShell

WORK EXPERIENCE

Principal DevOps Architect

Enterprise Systems Inc. | 2018 - Present

- Designed and built a multi-region Kubernetes infrastructure on AWS and GCP, serving millions of users daily.
- Wrote complex Infrastructure-as-Code scripts using Terraform and Ansible to deploy cloud microservices.
- Managed database clusters using Cassandra and Redis, optimizing write/read performance.
- Automated global delivery systems via Jenkins and GitLab CI/CD pipelines.

Lead Systems Engineer

CloudScale Tech | 2014 - 2018

- Managed high-availability Linux servers and designed Docker container clusters.
- Configured logging and monitoring systems using Prometheus, Grafana, and Elasticsearch.

Systems Administrator

NetOps LLC | 2010 - 2014

- Maintained windows/linux servers and automated administration tasks using Bash and PowerShell.

EDUCATION

Doctor of Philosophy (PhD) in Computer Systems

Technical Institute of Science | 2007 - 2010

- Research Focus: Distributed Systems and Cloud Computing Architectures.

Master of Science in Computer Engineering

Technical Institute of Science | 2005 - 2007
